

Specific **Pharma**

We connect patients with a world of medicinal knowledge

Specific Pharma is a leading European supplier of unlicensed medicines for patients with an unmet medical need, and supplier of comparators for clinical trials.

About Specific Pharma

We help patients in need of medication that is otherwise unavailable in their country. The timely access to unlicensed medicines is crucial to their treatment, and therefore healthcare providers value the professional, speedy and quality based service Specific Pharma is known for.

Specific Pharma is also a preferred partner for pharmaceutical and biotechnological companies, which makes us part of a global network of medicinal knowledge for pharmacies and healthcare providers to tap into. More importantly, we are a reliable provider of unlicensed medicines and medicines for special purposes such as clinical trials and situations of drug shortage.

Unlicensed Medicines

Medical practitioners strive to provide the best possible treatment for their patients. At times this ambition is hindered by the unavailability of effective pharmaceuticals. There are several reasons, why a particular product is unavailable to a patient in a particular country:

- It is under development undergoing clinical trial
- It has been discontinued
- It has not yet been registered in the specific country
- It is on back order, because a pharmaceutical company is unable to keep up with demand
- It only has effect on a small group of patients and is therefore only registered in few countries.

Specific Pharma has a special commitment to help physicians and pharmacies provide their patients with the medicine they need – and we have the skills, network and authorisations to do so.

Clinical Trial Procurement

Clinical trials are a struggle against time, and pharmaceutical companies often meet challenges in availability of products to compare their medicines against. The timely access to comparator products is crucial to the success of a clinical trial.

Specific Pharma provides assured access to comparator drugs, add-on medications and other products for clinical trials.

We operate with complete confidentiality throughout the supply chain, and we have the experience and partner network necessary to provide the best availability of products and documentation.

By signing an agreement with us before your need for comparator drugs arises, we are able to offer a shorter timeframe and competitive prices.

Authorisations

Specific Pharma is authorised to handle pharmaceuticals including storage, import and worldwide distribution of medicines.

Specific Pharma a/s is a subsidiary of the Danish pharmaceutical wholesaler Nomeco A/S. Nomeco is part of Phoenix group.
